

FibaFuse Nonwoven

Non-woven reinforcing tape FibaFuse[®] Light & Slim

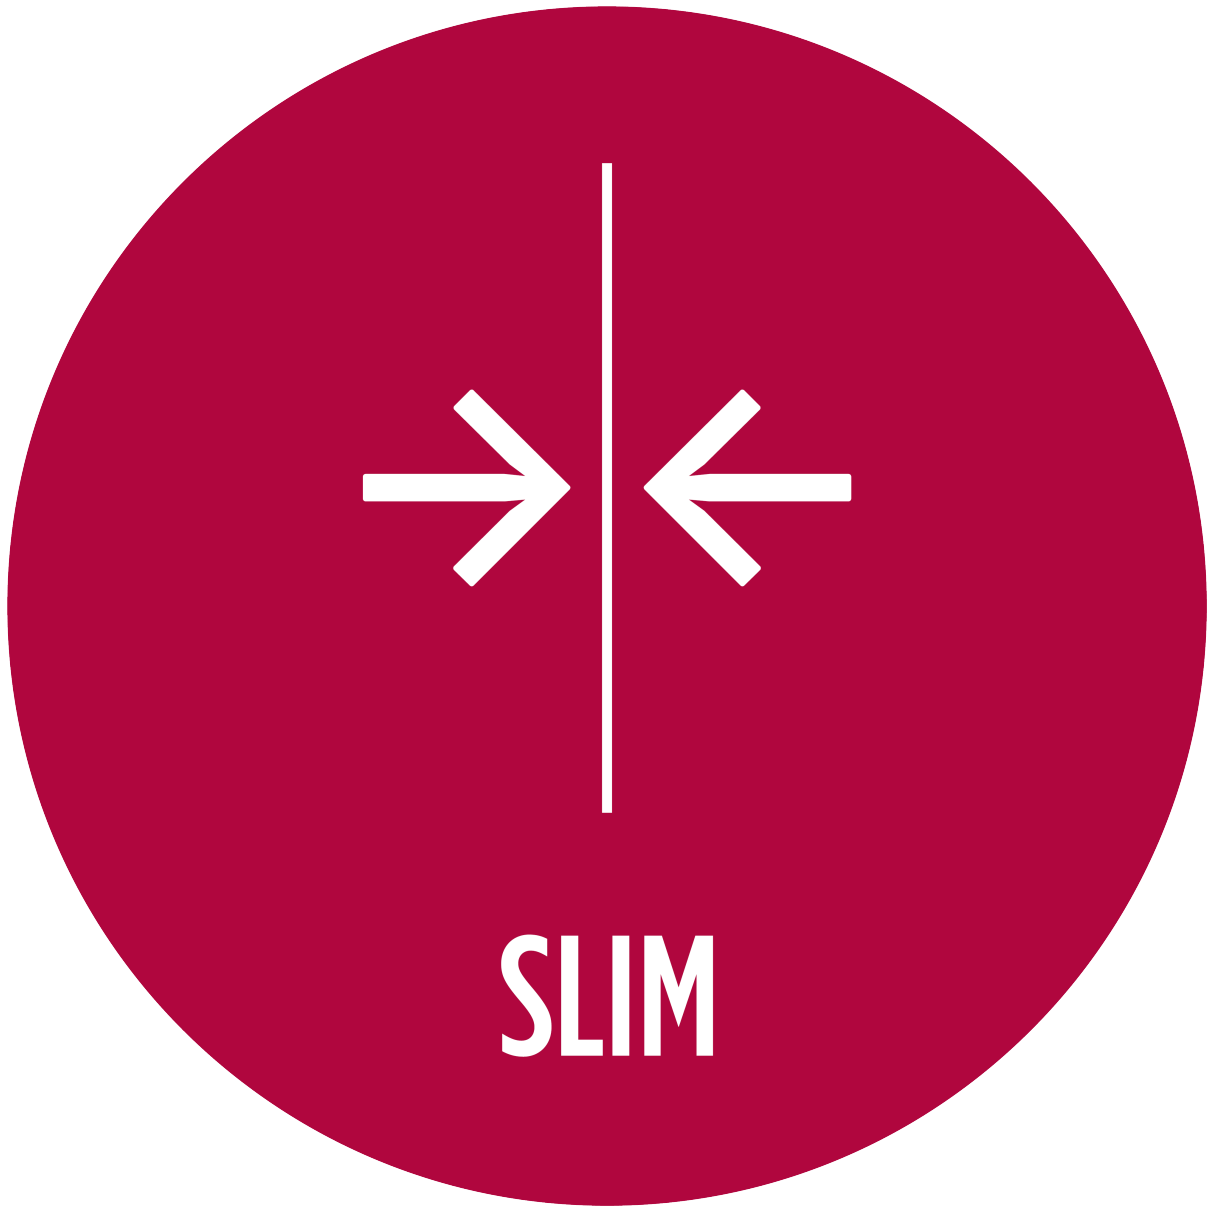

Brand
ADFORS FibaFuse[®]

Cost-effective alternative to traditional paper tape, offering the durability of fibre glass at a lower price.

Product Overview

This non woven drywall tape is not only economic, but also boasts superb mechanical performance. Its porous design allows compound to flow through the tape and adhere neatly to the wall thus eliminating the risk of blisters or bubbles. It is suitable for complicated or curved shapes, and perfect for sanding, as the tape remains almost invisible, even under a low layer of compound. FibaFuse[®] Light & Slim is ideal for use with drywall joints and finishing, and also crack repair.

- Cost effective alternative to paper tape
- Naturally mold resistant
- Slim
- Easy to cut
- Smooth finish
